At BOTANif, we are committed to you, and we are here to help.

As of March 15<sup>th</sup>, 2020, we have converted ALL manufacturing, within our FDA registered facility, to produce the highest grade medical and institutional FDA approved formulations of hand sanitizer and anti-bacterial surface cleaners.

We understand these are trying times. The COVID-19 pandemic has everyone feeling uncertain and nervous. We know there is a need for trusted sources to help you feel safer and more stable.

We are here for you, and we hope you find our products provide the comfort you need during this trying time. All of our products are:

PURE. TESTED.. PROVEN...

## PURE.

PURE products require PURE ingredients. We source and manufacture our own ingredients. Our product formulations are 100% FDA approved with full transparency. We utilize pharmaceutical grade processes in the creation of every product.

## TESTED..

Our rigorous quality control procedures, and in-house lab analysis, are backed by 3rd party audits to ensure the highest confidence in product purity and consistency. Our commitment to giving our customers the assurance of quality and consistency they require, are unprecedented in the industry.

## PROVEN...

We're working for our customers and the industry, by actively promoting legislation while engaging in research with key universities. We, alongside our research partner universities, are committed to better protect and promote the interest, health, and well-being of our agricultural partners and retail customers.

**Active Ingredient:** **80% Ethyl Alcohol v/v** **Anti-microbial**  
 Ethyl alcohol (ethanol) is the anti-microbial active ingredient. Our formulation dilutes the ethanol to the FDA recommended 80% to slow the drying time, creating a longer contact time. Ethyl alcohol needs to have a contact time of at least 10 seconds to kill many microbes such as the following:

- *Pseudomonas aeruginosa*
- *Serratia marcescens*
- *E. coli*
- *Salmonella typhosa*
- *Staphylococcus aureus*
- *Streptococcus pyogenes*

**Inactive Ingredients:** These ingredients are used in small amounts but do assist in the anti-microbial properties and in the purification of the product.

Denaturant per Federal Guidelines  
 Glycerol (1.45% v/v)  
 Hydrogen peroxide (0.125% v/v)  
 Sterile distilled and filtered water.
